

Computer Networking

Demonstrate different types of network topologies through practical implementation using **Cisco Packet Tracer** or any other simulation tool.

Instructions:

1. Create and configure the following topologies:
 - o Bus
 - o Star
 - o Ring
 - o Mesh
 - o Tree
 - o Hybrid

2. For each topology, include:
 - o Screenshot of the topology created
 - o Device configuration steps (if used)

Evaluation Criteria:

- All topologies completed
- Correct and clear configurations
- Well-labeled screenshots and files

Submit your practical files (Packet Tracer files + screenshots) to the VLE before the deadline.
