ONLINE NOTE SHARING PLATFORM

WEB PROGRAMMING II

INTRODUCTION

In today’s academic environment, students often face challenges in finding reliable study materials, especially when they miss lectures.

Our Online Notes Sharing Platform is a free and user-friendly web application designed to help university students upload, download, and discuss study notes in one place.

.

OBJECTIVES

- Develop a simple and effective web platform for students to share and access notes.
- Encourage peer-to-peer collaboration and learning.
- Provide secure login, commenting, and file management.
- Create a responsive interface that works across devices.

PROBLEM STATEMENT

- Students struggle to find quality notes when they miss lectures.
- Existing platforms are paid or not designed for university students.
- Need for a free, centralized system that allows easy sharing and retrieval of study materials.

PROPOSED SOLUTION

- Register and log in securely.
- Upload study notes (PDF or DOC).
- Download and comment on other students’ notes.
- Search or filter notes by titles or tags.

TECHNOLOGY STACK

Front End
HTML, CSS, JavaScript, Bootstrap

Backend
PHP

Database
MySQL

SYSTEM ARCHITECTURE

1. Frontend: Handles user interface (HTML, CSS, JS).
2. Backend: PHP processes user requests (login, upload, download).
3. Database: MySQL stores users, notes, and comments.

SYSTEM FEATURES

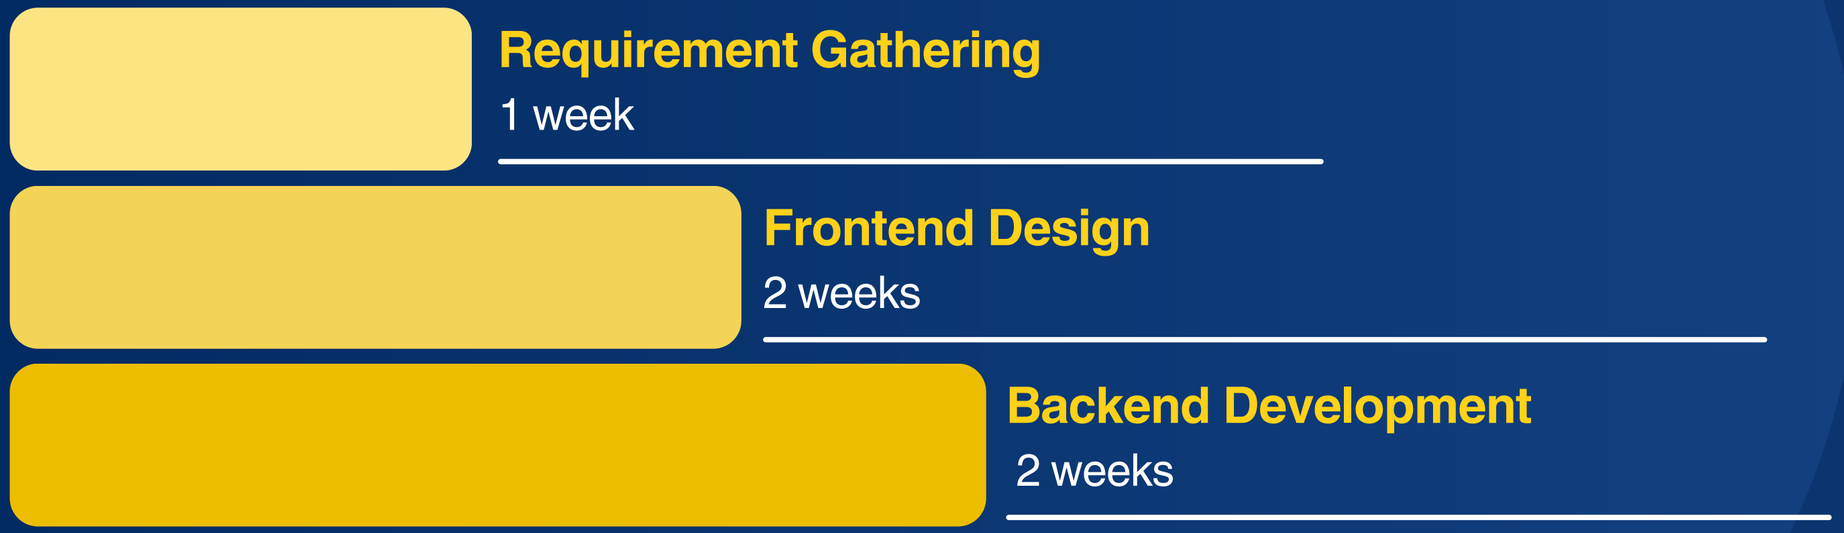

- User Authentication: Register, login, and profile management.
- Notes Management: Upload, view, and download notes.
- Commenting System: Add or view comments on notes.
- Admin Panel: Manage users and remove spam.

SECURITY MEASURES

- File upload validation.
- Passwords stored using hashing.
- Sanitized user inputs to prevent SQL injection.
- Admin control for removing spam content.

FUTURE ENHANCEMENTS & CONCLUSION

Future Enhancements:

- Add profile customization for users.
- Add a note rating and reporting system.
- Introduce AI-based note recommendation.

Conclusion:

- Our Online Notes Sharing Platform successfully provides a free, secure, and collaborative way for students to share and access study notes.
- It addresses a real problem and demonstrates practical web development skills.
